

Agenda

- Sample and progress (Matt & Yiki) [15 minutes]
- Briefly describe the final product (Notes for proposal) [20 minutes]
- Walk us through the data; epochs; How to plot manually (Sash)? [10 minutes]

Questions: (15 minutes)

- What does each file represent in the file folder? Each experiment? Each experimental unit? The current file seems to contain 1.5 hours of continuous data when imported.
- There are two instances for each channel for each time stamps in the data, correct?
- What file type is more convenient to export?
- Would you like our visualization to work with EEG data that has a higher number of nodes?
- Is MIT license okay? Are visualizations of data in rough-work on GitHub okay?
- What are your thoughts on Neurolink?
